October 30, 2006

Dear Residents,

As of December 1, 2006 ALL units MUST have HURRICANE PROOF windows. All windows will be inspected with a machine that determines thickness of the glass and if it meets code. If your unit needs windows, please contract with a window company and give a copy of the contract to the office. On December 1, 2006 all units will have the glass checked. It is IMPERATIVE we follow the guidelines per our insurance company. If a unit is checked and it is not hurricane impact glass and there is no contract on file with the office we WILL be forced to order and install the correct windows for your unit and you will be billed accordingly.

Board of Directors
